DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 8, 9, 13, 15, and 19 are rejected under 35 U.S.C. 102(e) as being anticipated by Wong et al (6,585,555). Regarding claims 8, 9, 13, and 15, Wong discloses a ball comprising a core and a cover (col. 2, lines 36-40). The cover includes a thermochromic paint (primer) that changes color according to the temperature (abstract). Wong discloses the thermochromic materials suitable for the invention are found in US 4,028,118, Nakasuji et al which is incorporated into the '555, Wong patent (col. 3, lines 40-45). Nakasuji discloses the thermochromic material may include liquid crystals or leuco dye. Regarding claims 13, and 19, several colors are permanently displayed while one or more colors change when the temperature changes (col. 2, lines 57-63).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 12, 14, 18, and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wong et al. The additional cover and/or core layer is an obvious duplication of the first core and cover layers. One of ordinary skill in the art would have included a second core and/or cover layer to increase the durability of the ball.

Allowable Subject Matter

Claims 1 and 5-7 are allowed.
